

## Testing the GPS Coursemarker Detector

Thanks so much for taking a few minutes to test out the GPS Coursemarker Detector! This short route starts at the Cuesta Park parking lot and notes a few CMs you should pick up as you go – see the attached map for their locations as well.

**When you're ready to start, click "Start the Rallye" on the site when you're at the light just before you leave the parking lot.**

1. L at Cuesta
2. R at Fordham (1st chance after Miramonte)
3. R at Sladky

You should pick up **TEST 1111** on Sladky between Fordham and Duke  
There's an additional CM, **TEST 2222** past Duke that you should **NOT** pick up

4. L 1st chance (Duke, but the sign is hard to see)
5. L at Jefferson

You should pick up **TEST 3333** after Jefferson changes into Lee  
You'll pass **TEST 4444** facing the wrong direction and should **NOT** pick it up

6. U at Tulane

Now, you should pick up **TEST 4444** but **NOT** see **TEST 3333**

7. Continue on Lee through the name changes to Jefferson then Cornell
8. R at T (This is Tulane but the sign is missing)

You should pick up **TEST 5555** along Tulane after the forced turn

That's it! You can now close out of the coursemarker site on your phone, and may want to reset any settings you changed to use it (e.g., auto-sleep, location services, volume, etc).

Thanks again for taking time to test out the app – please send us a quick note to let us know how it went (and what type of phone you were using)!
